AVERY CLASSICS

WHAT EVERYBODY WANTS TO KNOW ABOUT EMPIRE STATE

LOCATION: West side of Fifth Avenue, between 34th Street and 33d Street.

DIMENSIONS OF PLOT: 197.5 feet on Fifth Avenue, 424.95 on 34th Street and 33d Street. (This comprises the plot of the old Waldorf-Astoria and additional land.)

AREA OF SITE: 83,860 square feet—about 2 acres.

HEIGHT OF BUILDING: 102 stories above the street, 2 stories below grade. 1,248 feet to the tip of the mooring mast. Observatory roof at 86th floor 1,040 feet. Mooring mast extends 200 feet higher. The building is the tallest structure of any kind in the world. The Eiffel Tower is 995 feet, the Chrysler Building, 1,046 feet to the tip of its spire (habitable only to 783 feet; Empire State is habitable to the very top). The Bank of Manhattan Building is 927 feet, the Woolworth Building 767 feet.

SET BACKS: Only 5 stories of Empire State cover the entire lot area. The tower sets back 60 feet from the lot line above the 6th floor.

Empire State has 6,400 windows.

10,000,000 bricks were used, there are 200,000 cubic feet of stone, 930 tons of exterior chrome-nickel steel and aluminum, nearly 7 miles of elevator shafts, enough floor space to shelter a city of 80,000.

There is a complete laundry to serve all tenants and an ozonating plant for drinking water. Ventilating machinery is installed to deliver 725,000 cubic feet of air per minute. All the air in two basements and the lower five floors will be changed 6 times per hour.

ELEVATORS: 63 passenger elevators and four freight elevators. All are Otis, signal control, self leveling. Express cars reach the 80th floor in less than one minute. Tower elevators from the 80th floor to the 86th floor, the mast elevator from 86th floor roof to observatory atop the mooring mast. Elevators rise at a speed of 1,000 feet per minute.

EXTERIOR MASONRY: Indiana limestone and granite with strips of chrome-nickel steel extending from the 6th to 86th floor. Mooring mast is enclosed with glass, chrome-nickel steel and aluminum, illuminated from within and without and carrying a beacon at the top.

SIGHT-SEEING FACILITIES: Empire State observatories will be open to the public daily including Sunday from eight in the morning until one at night, on the 86th floor and at the top of the mooring mast. 2,000 visitors can be accommodated on the lower level and 100 atop the mast.
